<Description>Bela Suchdev is mother of three, working, and now going back
to school.Bela recieved a degree in Homeopathy Medicine at the age of 23
from Anand Homeopathic college in India.She is happily married and all
her children are driving now!She has been living in U.S.A for almost 25
years. Before taking XML class, Bela has taken one more class online with
UMUC.She plans to continue her education in Computer Science.She is
working as a biller and manager for husband's medical practice for 18
years and has had a great success.Besides, she has volunteered at local
Highschool and Indian organization of Charleston WV. Bela would wish
more people would get to know classes offered at UMUC - online.This
class was definately worth taking and Professor Johnson has taught very
well all the aspect of XML. I learned how to write XML Vocabulary and
complimenting DTD as well as Schema.Understanding of Namespace is
also covered. For final project Bela will write two XML documents with
name spaces and possibly XSL or CSS stylesheet.I want to thank
Professor Johnson for encouraging me to learn XML.Bela is excited that
she now knows how to make a web site using free tools provided by
Wiki.Overall this class has been stepping stone of the future
classes.</Description>

<Description>Makeda Heard is a returning student to UMUC. She began her
studies on her first bachelor's degree when her oldest daughter was 19
months old in 1976. She was studying at a local community college and
transferred to UMUC through Mind Extension University. She was married
at the time and her surname was White. She is now happily divorced and
all her children are grown. She has five grandchildren ranging in ages
from newborn to 5 years of age. CMIS170 is her second computer course
attempted after her return to UMUC in summer of 2011. Makeda works for
Johns Hopkins at the Bayview campus and wears many hats. She is
responsible for two websites. While studying and learning XML she not
only was getting closer to her goal of graduation but also reviewing
technology and thinking about ways XML might be used at work. Makeda

```

definitely would recommend this class to other students. Tiffany Johnson her professor was patient, fair and kind. To date they learned how to write well-formed XML documents, how to write documents using DTD and schemas. This week the students are learning style sheets (XSLT) for XML documents and current uses for XML. This final project is primarily based on the first two projects using DTD and XSD nomenclatures. If time permits Makeda definitely would like to use an XSLT as well to make the final product more acceptable.</Description>
